

Press Release: SEVERALS - STORM

The world is slowly healing from the long lasting covid crisis and returning to a healthy way of social and cultural life. The band SEVERALS is also back on March 25th, 2022 with their brand new release - single STORM. It's the first single from their upcoming debut LP called Algorithm, which will be released later this year.

"We all get hurt by someone on our journey through life and are sometimes faced with the need to accept that loss and suffering are an essential part of being alive. We need to find our peace in the storm."

This is the main theme behind the lyrics of STORM, a song that pulls you in with emotional lyrics, Dominik's lead vocals and aggressive guitar riffs.

This single and the whole LP were recorded in a private studio with producer Pavel Chyška, who's worked with numerous local acts, such as Fall from Everest or Lighthouse Keeper. Mix and Mastering were done by Australian mixing engineer Lance Prenc, whose portfolio includes leading AU metalcore bands like Polaris, Alpha Wolf, Diamond Construct or Thornhill.

The music video was once again written, shot and directed by the band's frontman Dominik Fencel, who's done stellar work with editing and visual effects. The lead actor, portrayed by Štěpán Staněk, is lost in his struggling mind as he's traveling through metaphorical portals on his way to acceptance of loss.

What's next for SEVERALS? Let's wait and see!
